

# bt 86

## Semi-automatic stripper

bt 86

0068399/0

*The bt 86 is the optimum device for processing coaxial and triaxial cables as well as single cables. Reliable, quick and absolutely precise technology plus a high degree of user friendliness are just a few of the highlights that make the bt 86 semi-automatic stripper such a standout.*

### Function

The bt 86 is a fully programmable semi-automatic machine. On its control panel, you can program and save up to 99 wire types with up to 9 stripping steps. That eliminates the need for conversion and increases productivity. You can also program several specific functions for each stripping step.

The bt 86 has a rotating stripping head. Its operating precision, coupled with the high quality blades, allows even the most difficult coaxial and triaxial cables to be stripped with precision, speed and great repetition accuracy. The bt 86 is also a compelling performer for the excellent results it achieves on fine coaxial cables.

### Your benefits

- Highly precise and reliable processing of coaxial, triaxial and single cables
- Excellent results on fine coaxial cables
- 9 stripping steps
- Memory for 99 different wire types
- Stripping length up to 30mm

### Programmable functions

- Stripping length
- Stripping diameter
- Partial pull-off
- Pull-off speed
- Rotational time of stripping head
- Direction of rotation of stripping head
- Slight opening of blades prior to pull-off (way back)
- etc.

### Technical data

Stripping length:	min. 0.1mm – max. 30mm
Wire diameter:	up to 7mm
Number of stripping steps:	max. of 9
Memory capacity:	max. of 99 wire types
Cables that can be processed:	single /coaxial/triaxial/ semi-flexible
Loudness in operation:	60dB
Electrical connections:	115/230V, 50/60Hz
Dimensions (W x L x H):	175 x 410 x 170mm
Weight:	ca. 10kg
PC interface:	RS232 (option)
